

# PROBLEM WITH SPACE MISSION

Astronauts are parted from their home in space missions which stress their mental and physical health

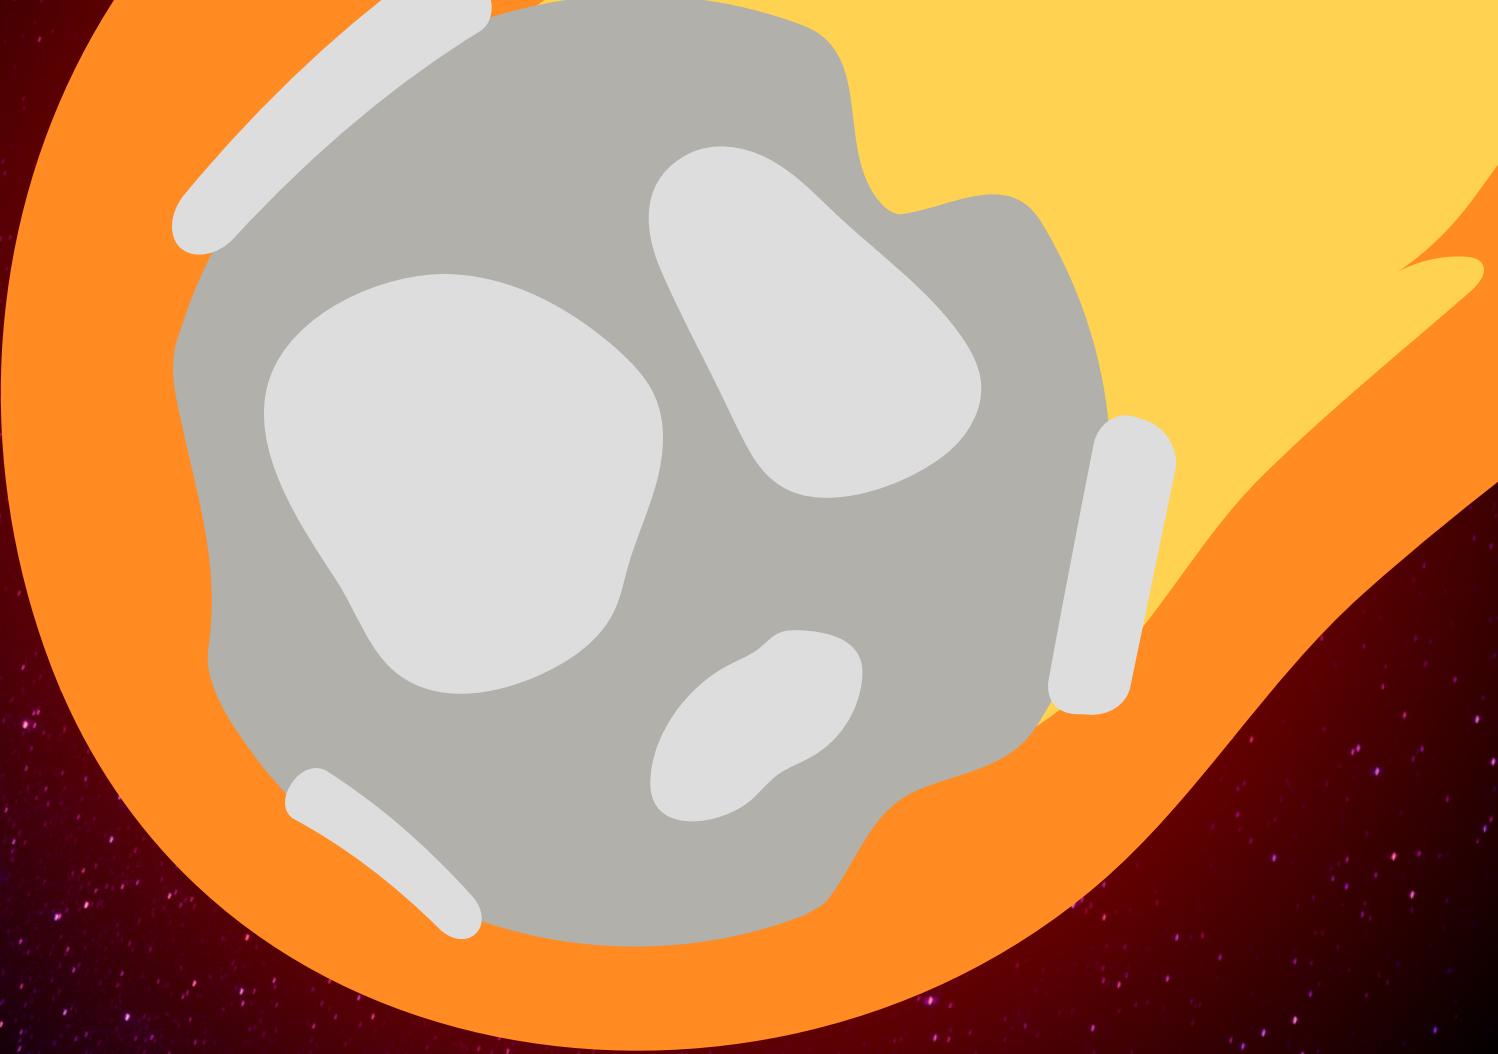

# SPACE-HERO COMPANION

Offers astronauts a cute companion which will accompany them throughout their journey in microgravity space

## CUSTOMIZE THEM

companion can be customize to their preference which make the game visually pleasing and more enjoyable

## FEED THEM

you have to feed your companion to increase their mood and happiness guage! The guage will effect their behaviours and emotions so be careful and always take care of them!

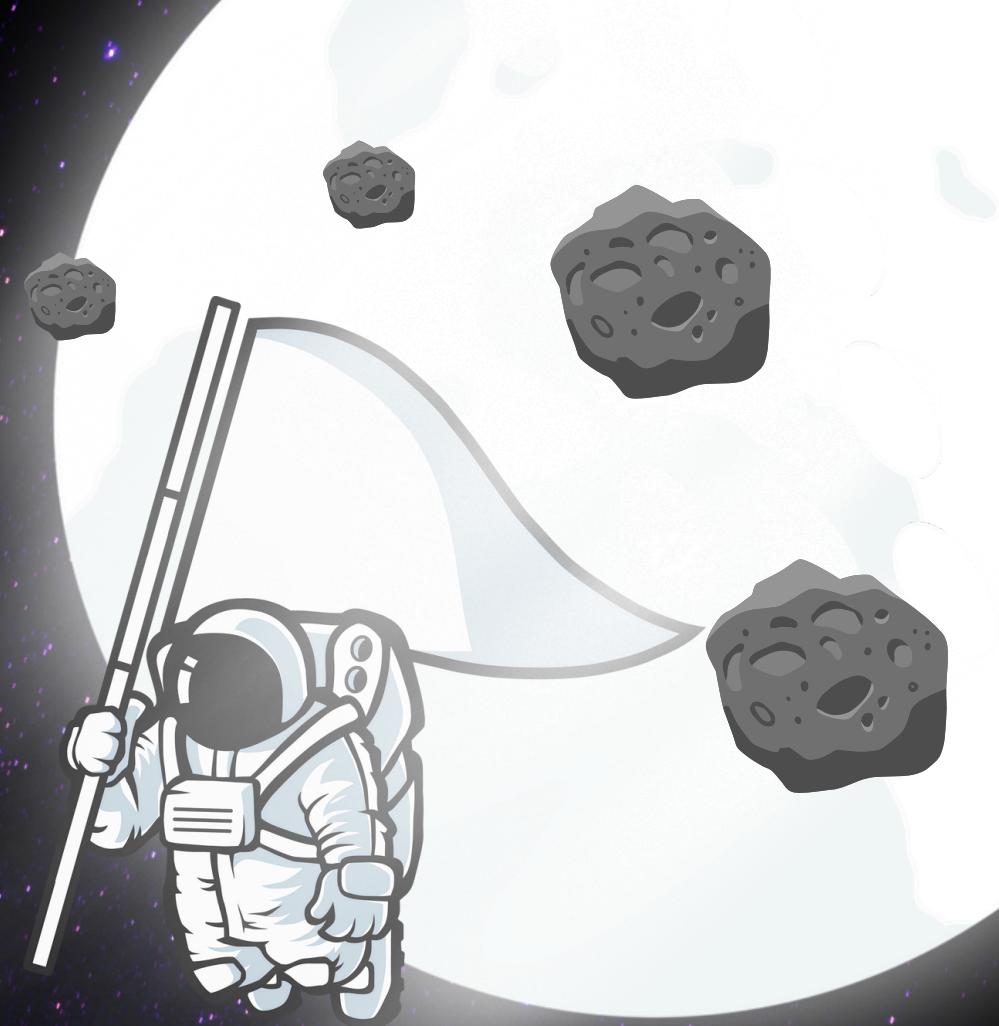

# GET ENCOURAGED

the companion will motivate and encourage astronauts through positive messages, tracking achievements and provides inspirational content to help maintain mental health as a result performances in their mission are improved

# HEALTH DATA ANALYSIS

our game also collects, analyzes and reports astronaut health data in real time to track, prevent and manage potential health issues during a mission it also provide personalized health advice to help maintain long-term health and safety of astronauts.

# TECHNICAL IMPLEMENTATION

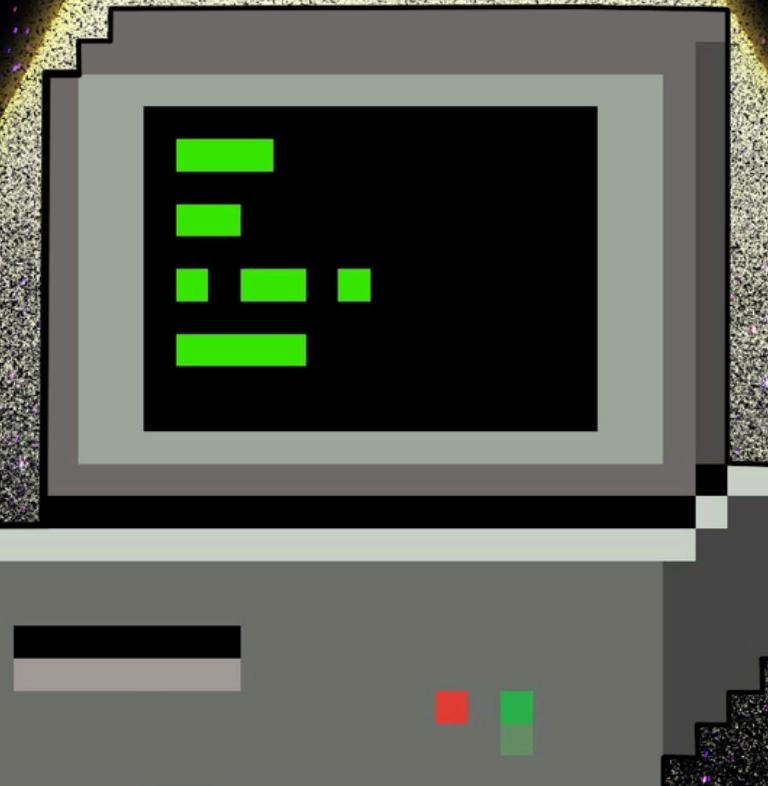

This game is powered by Unity Game Engine  
which used C# for scripting.

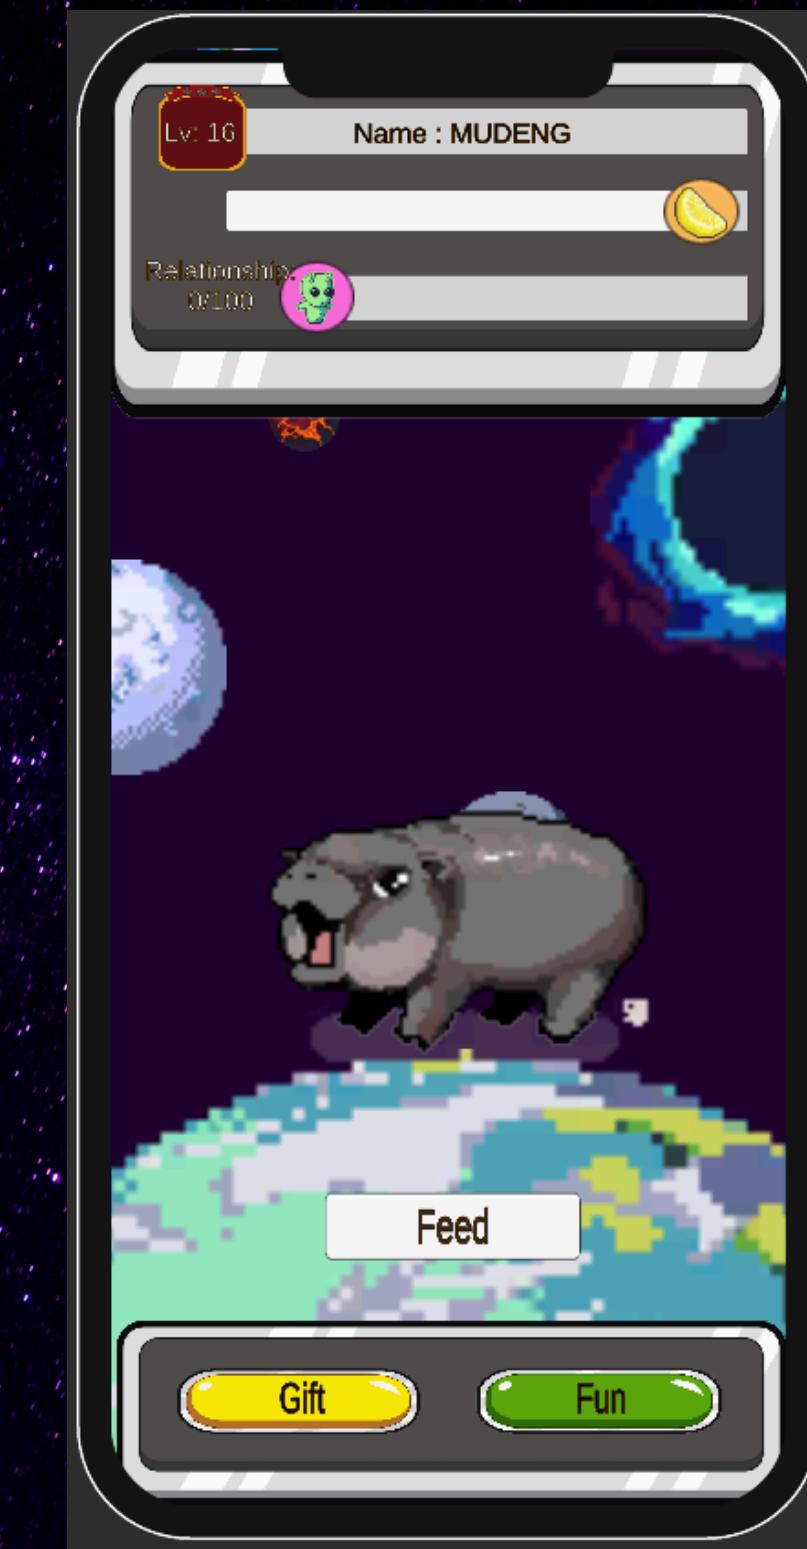

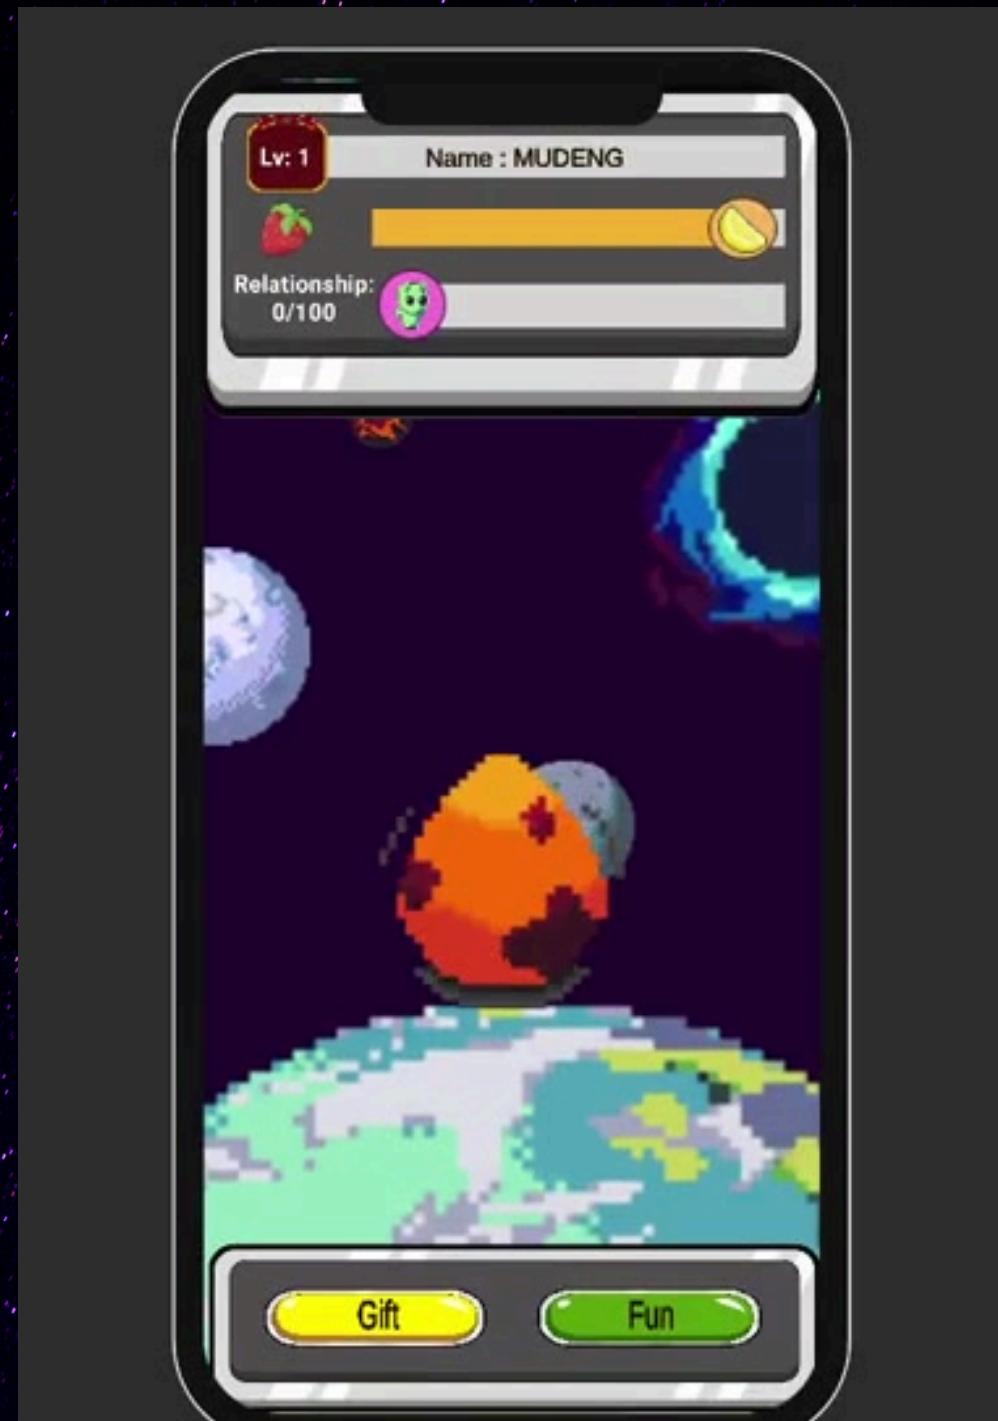

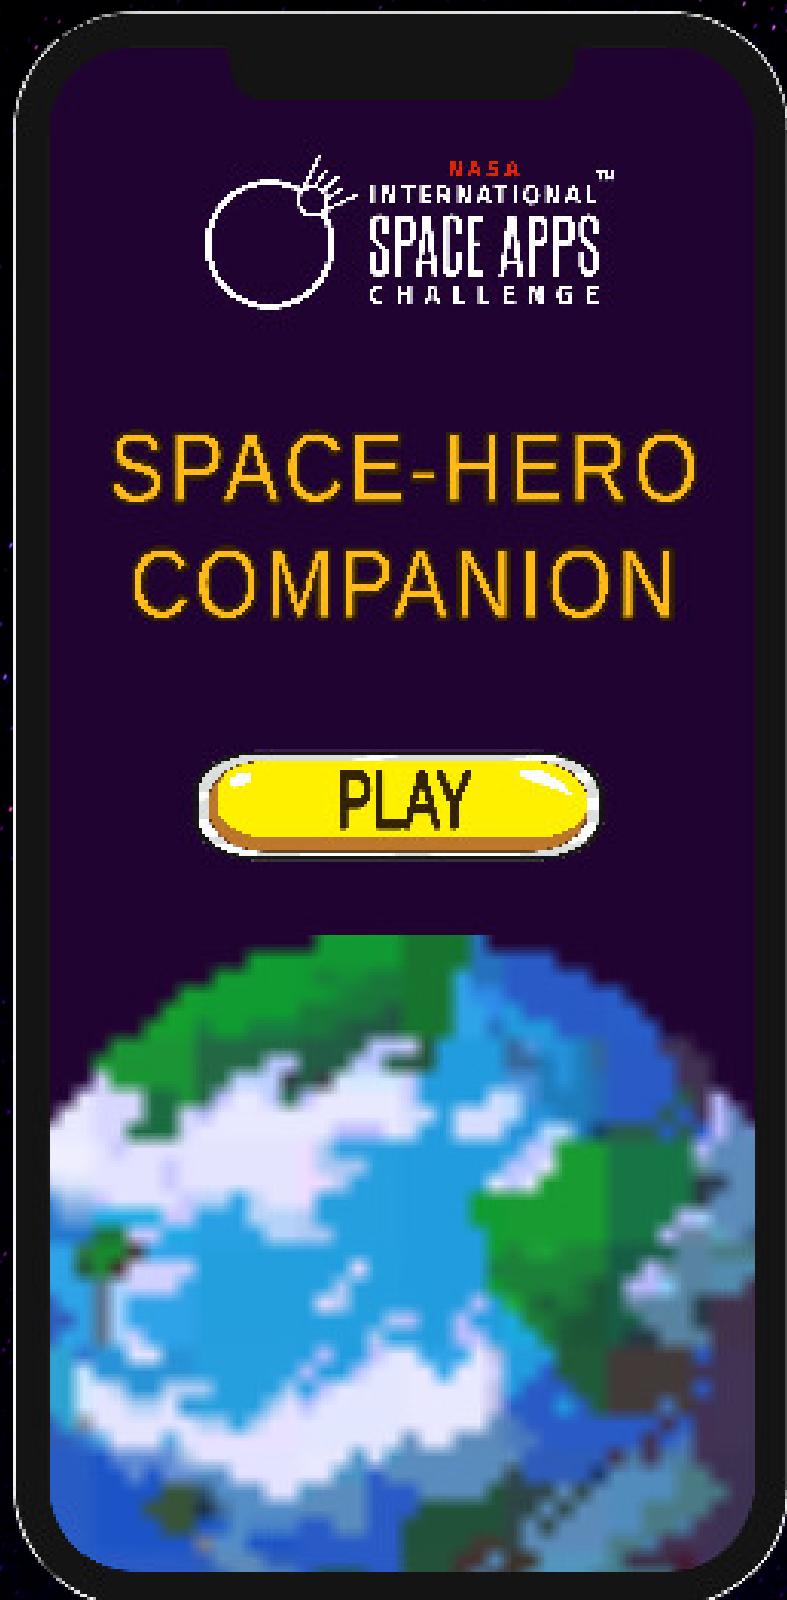

For us, astronauts heroes, helping  
the Earth from space, we want to honor them  
resulting in “Space-Hero” phrase in our project name
